DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 26-28, 43, drawn to an immunoregulator from urine, classified in class 424, subclass 543.
- II. Claims 5-16, 29-30, 44-51, drawn to an immunoregulator from a gonatropin preparation, classified in class 514, subclass 21.
- III. Claims 17-24, 31-35, drawn to a method of treating an immune mediated disorder, classified in class 424, subclass 543.
- IV. Claim 25, drawn to a method of treating an immune mediated disorder, classified in class 514, subclass 21.
- V. Claims 36-39, drawn to an assay method, classified in class 424, subclass 543.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, they are obtained from different sources and have different modes of operation.

Inventions of Groups I & II and III & IV are related as product and process of use.

The inventions can be shown to be distinct if either or both of the following can be

Art Unit: 1651

shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the methods can be practiced with a materially different product, such as insulin.

Inventions of Groups I-IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, have different effects and different modes of operation.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
